REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the prior art of record [such as US006491411B2] teaches a liquid crystal display module, comprising: a first bezel module, having: a lower bezel [not labeled but bezel below cell 5]; a diffusion plate; an optical film plate set up over the diffusion plate [see specification]; a liquid crystal panel set up over the optical film plate [5]; and an upper bezel above the lower bezel [bezel above cell 5] such that the lower bezel and the upper bezel together fix the liquid crystal panel [180]; a second bezel module, having: a bottom bezel [4]; a reflecting plate set up on the bottom surface of the bottom bezel [2]; and a light source positioned within the bottom bezel above the reflecting plate [1], wherein the first bezel module is assembled with the second bezel module in a detachable way [see screws holes, it is obvious to use the screw holes to fix the bezels together]. The prior art of record does not teach nor suggest, the diffusion plate set up over the lower bezel; an optical film plate set up over the diffusion plate and the diffusion plate, the optical film plate and cell are fixed by the upper and lower bezel.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to James A. Dudek whose telephone number is 571-272-2290. The examiner can normally be reached on 9:00-5:30.
